Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Owen et al.

The Owen et al. reference discloses an apparatus for evacuating an inflatable article (i.e. bag) comprising a case 26, a flange (149,149') for actuating valve (S.V.), a fan 14 and a motor 12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Owen et al. in view of Yan.

The Owen et al. reference discloses a hand held evacuation apparatus (supra) which contemplates the use of a direct DC current source, but does not disclose a rechargeable battery with associated LED indicator. The Yan reference discloses a rechargeable battery and charger arrangement with associated LED indicators for use in a hand-held tool such as a drill thereby facilitating portability of the tool and aid the user in recharging the associated battery (see col. 6,

lines 29-37). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Owen et al. device to accommodate a rechargeable battery with associated LED indicator in view of the teachings of the Yan reference by facilitating portability of the tool and aid the user in recharging the associated battery (see col. 6, lines 29-37).

Conclusion

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

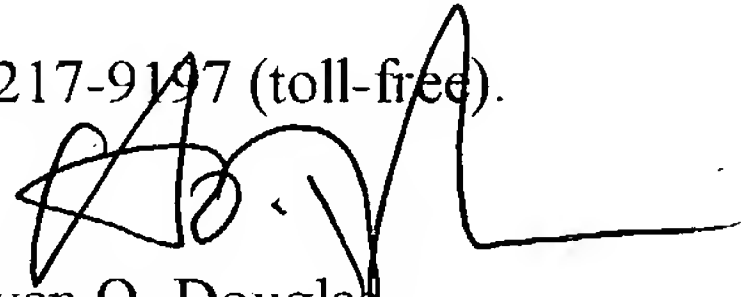

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Chen and Chaffee references pertain to other receptacle evacuation device with associated fans.
